

# KAUPULEHU PH2 Lot 2A DRAFT

## LEGEND

January 31, 2015

	Natural Area		Lot Boundary
	Transition Area		Building Envelope Boundary
	Private Area		Subzone Line
	Association Easement		150' Setback
	Secondary Transition Area		Stake Location and Number
	Preserved Lava Outcrops	<div style="border: 1px solid black; padding: 5px;"> <p>Lot Area: 3.31 AC±            Private Area: 53,123 SF±            Building Envelope Area: 57,723 SF ±            Building Height Max. Elevation: 54.5' (18' height)            Max. Irrigated Area/Quantity: 59,567 SF ± 7,394 GPD</p> </div>	

The locations of the Private Area, Natural Area, Transition Area, Association Easement and other physical structures and height of the pad elevation depicted on this diagram are approximations. Purchasers are advised to verify the same prior to commencing construction. All elevations are from sea level which is elevation 0'. This illustration/map/depiction is based on the current proposed development concepts and actual development may vary from what is depicted. As our vision for the project evolves, facilities, features and other components are subject to change, have not yet been, and may not be, constructed.

*The slopes shown and depicted on this plan are design slopes only. Actual slopes in the field will vary. All linear or square footages for Transition Zone and Building Envelope within homesite boundary lines are estimates only, and may have been determined from previous design plans without subsequent survey. Owner or prospective owner is solely responsible for determining actual slope locations and dimensions for buildable area and buildable pads. If owner, prospective owner, or any agent, representative, consultant or contractor of owner or prospective owner (collectively, owner) wishes to determine actual property lines, slope locations and dimensions of buildable area and building pads, owner should cause to be performed a survey of the homesite(s) under consideration. This material is presented as being representational, only, of the Building Envelope and is not intended as a substitute for onsite inspection and independent determination by owner of the attributes of the homesite which are suitable for satisfying owner's intended purposes.*

*The Private, Transition and Natural Area boundaries, dimensions, areas, irrigation quantities, lot lines, topography and features and/or information shown on this diagram are for approximate and for information only. As diagrams are generally prepared prior to the approval of Final Subdivision Maps, there may be inconsistencies between the diagrams and the Final Subdivision Maps. Every effort has been made to update the diagrams to the Subdivision Maps, but owners are encouraged to confirm all relevant lot characteristics with the approved Final Subdivision Map on file with the local jurisdictional agency. These diagrams are not a substitute for a lot survey, and no representation regarding the accuracy or completeness of the information shown on the diagram is made.*
